

*Conc'd
C1 A 2
Conc'd*
filler is an alumina powder.

a3
5. (ONCE AMENDED) A plasma display panel according to claim 1, wherein the
filler is hollow glass micro-balloons.

a4
6. (ONCE AMENDED) A plasma display panel according to claim 1, wherein the
thickness of the dielectric layer is 10 μm or less.

Sub C1 a5
13. (ONCE AMENDED) A plasma display panel according to claim 7 further
comprising barrier ribs for partitioning a discharge space, wherein sidewalls of the barrier ribs are
covered with the dielectric layer.

Sub C1 a6
19. (ONCE AMENDED) A plasma display panel according to claim 7, wherein a
light-shielding layer is provided on a front side with respect to a discharge space and the dielectric
layer is provided on a rear side with respect to the light-shielding layer.

Sub C1 a7
21. (ONCE AMENDED) A process for manufacturing a substrate structure wherein,
in manufacture of the substrate structure as set forth in claim 17, the dielectric layer is formed by
applying onto a substrate a low-melting-point glass paste in which a flake-form filler for enhancing
reflectance is mixed, followed by burning.
